Bonheiden, Belgium

Nina Wunderlich, MD
CardioVascular Center Frankfurt
Frankfurt, Germany

Inspite of all efforts in prevention, peripheral artery disease (PAD) is continuing to gain more importance. It affects more than 20 percent of the population over 70 years of age.

Even today many amputations are performed without prior angiography. But catheter treatment of PAD, especially total occlusions and below knee interventions, is improving rapidly and will soon set a new standard of treatment.

Endovascular Interventions (EVi) will provide comprehensive knowledge about the technique of catheter therapy of PAD.

Interaction is the key to success. The essential element of EVi is the combination of high quality, live-case presentations and related topical lectures.

This dynamic format is essential for stimulating open and informal discussions between the participants, faculty members and live-case presenters and is one of the main aims of EVi.

EVi takes place on December 3 – 4, 2008, just before ICCA 2008 – 8th International Course on Carotid Angioplasty and Other Cerebrovascular Interventions.

ABOUT EVi 08

WEDNESDAY, DECEMBER 3, 2008

12:00 – 18:30 REGISTRATION

14:00 – 14:10 WELCOME AND INTRODUCTION

14:10 – 18:30 EVi SESSION I SFA AND ILIAC INTERVENTIONS

SFA and Iliac Interventions: State of the Art

Live Case Transmissions From Frankfurt

Interactive Discussions

Debates

Challenging Cases

19:00 – 21:30 DINNER BUFFET AT THE MARITIM HOTEL

Sponsored by Invatec

THURSDAY, DECEMBER 4, 2008

07:00 – 18:00 REGISTRATION

07:00 – 08:00 BREAKFAST AT THE CONGRESS CENTER

08:00 – 11:00 EVi SESSION II BELOW THE KNEE INTERVENTIONS

Below the Knee Interventions: State of the Art

Live Case Transmissions From Frankfurt and Leipzig

Interactive Discussions

Debates

Challenging Cases

11:00 – 12:20

EVi SESSION III RENAL INTERVENTIONS

Renal Interventions: State of the Art
Live Case Transmissions From Frankfurt and Leipzig
Interactive Discussions
Debates
Challenging Cases

CLOSING REMARKS AND THANK YOU

12:30 – 14:00

EVi LUNCH SESSIONS AND INDUSTRY EXHIBITION

ROOM D1

CHALLENGING PERIPHERAL CASES – STEP BY STEP

Interactive Discussion With the Experts
Case 1
Case 2
Case 3
Case 4

ROOM E1

CHALLENGING PERIPHERAL CASES – STEP BY STEP

Interactive Discussion With the Experts
Case 1
Case 2
Case 3
Case 4

SPEKTRUM 2

MINIMAL INVASIVE THERAPY OF AORTIC ANEURYSMS

Overview About Techniques and Devices

Results of Randomized Trials

Total Percutaneous Approach Using Perclose

Fenestrated and Branched Abdominal Endografts

Fenestrated and Branched Thoracic Endograft
