## EVi 2008 – ENDOVASCULAR INTERVENTIONS

In spite of all efforts in prevention, peripheral artery disease (PAD) is continuing to gain more importance. It affects more than 20 percent of the population over 70 years of age.

Even today many amputations are performed without prior angiography. But catheter treatment of PAD, especially total occlusions and below knee interventions, is improving rapidly and will soon set a new standard of treatment. Endovascular Interventions (EVi) will provide comprehensive knowledge about the technique of catheter therapy of PAD.

Interaction is the key to success. The essential element of EVi is the combination of high quality, live-case presentations and related topical lectures.

This dynamic format is essential for stimulating open and informal discussions between the participants, faculty members and live-case presenters and is one of the main aims of Evi.

Due to the big success last year of ICCA 07 we proudly announce that all sessions of Evi and ICCA 2008 again will be streamed live to the internet.

### COURSE DIRECTORS

Horst Sievert, MD  
CardioVascular Center Frankfurt  
Frankfurt, Germany

Giancarlo Biaino, MD  
Gruppo Villa Maria Endovascular,  
Italy & Frankfurt, Germany

### CO-DIRECTORS

Marc Bosiers, MD  
AZ Sint-Blasius  
Dendermonde, Belgium

Patrick Peeters, MD  
Imelda Cardiovascular Center  
Bonheiden, Belgium

Nina Wunderlich, MD  
CardioVascular Center Frankfurt  
Frankfurt, Germany

## EVi-TOPICS 2008

- Below the Knee
- Renal Interventions
- SFA – Superficial Femoral Artery
- ILIAC

### SPECIAL SESSION

- Aortic Aneurysms

## LIVE CASE CENTER

Cardiovascular Center Frankfurt, Germany  
Heart Center Leipzig, Germany

## REGISTRATION FEES EVi 2008

<b>Online Registration until December 02, 2008</b>	per Person
Physicians, Industry Professionals	250,- €
Fellows, Nurses, Technicians	250,- €
Single day Ticket	125,- €
